

Typical Equipment Calibration List	
Description	Recommended Frequency
Micrometers	12 Months
Verniers	12 Months
Dial Test Indicators	12 Months
Torque Wrenches	6 Months
Pressure Gauges (Oil, Fuel, Brake etc.)	12 Months
Tyre Pressure Gauges	6 Months
Temperature Gauges (Paint Ovens etc.)	6 Months
Paint Scales	6 Months
Multimeters	6 Months
Tyre Tread Depth Gauges *	6 Months
Tread Depth Gauge Setting Block	12 Months
Brake Pad Thickness Gauge	6 Months
Air Con Scales	12 Months
Feeler Gauges *	12 Months
Tapes/Rules *	12 Months
Battery Tester	12 Months
Vacuum Gauges	12 Months
Wheel Balancers	6 Months
Body Jig Measures	12 Months
Paint Oven Pressure Gauge	12 Months
Oil/Fuel/AD Blue Dispensers	12 Months
Trammel	12 Months
Trailer Socket	12 Months
Headlamp Beam Tester	12 Months
Insulation Tester/Multimeter	12 Months
Voltage/Safety Probes	12 Months
Paint Thickness Gauge/Elcometer	12 Months
Refractometer/Antifreeze Tester	12 Months

The above list represents a sample of tools and equipment recommended for calibration based on common usage and measurement criteria. Each uniquely identifiable item will be supported by calibration certificates traceable to national Standards thus giving an individual record of equipment performance and history for review purposes.
